

To Whom It May Concern;

I am writing to express my opposition to the National Association of Broadcasters petition 04-160. I have been an XM customer for over and year and gladly pay the \$10 a month for its unique blend of programming.

I have also noticed they have started to do traffic and weather in major cities. I would very much appreciate and use this information should they be allowed to start providing this service to the Denver market.

I do not believe the NAB should have any sort of jurisdiction over a subscriber based service such as XM. Please allow myself and a million other customers to have a say in the programming we pay for.

Sincerely,

Tom Lange
Denver, CO
